OBJECTIVE

A position in MERN Stack Developer, which harnesses my skills in application development to innovate in new avenues, with at least six months of experience. I would enjoy being part of a team-oriented environment, striving for growth, and learning more about current web technologies. Staunch in coding high-quality code and always on the lookout for improvements in my technical skills and the skills of others. Looking forward to a position with a forward-thinking company that places a premium on creativity and excellence.

EDUCATION

Bachelors in Information Technology, University of Education Expected Sept 2024
Final Year Project: Auction System Web-Based

FSc. Pre Engineering, Punjab College 2018 - 2020

SKILLS

Technical Skills MERN Stack, React.js, Node.js, MongoDB, Express.js, Firebase, ORM(Sequelize), Redux, Tailwind CSS, WordPress

Soft Skills Team Collaboration, Resource Management, Communication.

EXPERIENCE

MERN Stack Developer as a Trainee Sept 2023 - Dec 2023
Company Name *Knowledge Streams*

- Crafted responsive websites for seamless multi-device experiences.
- Develop multiple projects using React.js and Express.js.
- RestFul API Integration

PROJECTS

E-commerce Website. Developed an E-commerce website using React.js, implementing a modern and user-friendly interface with React components and JSX syntax, implementing state management with Redux. Integrated Firebase for authentication and real-time database management, ensuring secure data storage.

CRUD Operation. Designed and implemented a robust CRUD (Create, Read, Update, Delete) operation using MongoDB as the database and Node.js with Express.js as the backend framework.

Auction Website Developed a fully responsive auction platform using the MERN stack (MongoDB, Express.js, React.js, Node.js) as part of my final year project. This project involved designing and implementing user-friendly interfaces, secure authentication, and real-time bidding functionalities, ensuring a seamless user experience across all devices. Currently in the development phase, this project demonstrates my proficiency in full-stack web development and responsive design principles.
